

How Much Are You Leaving On The Table?

Hardly any homeowners have flood coverage. Almost all of them need it.

99% of US counties flooded since 1996, but fewer than 10% of households have flood cover. Most that do are highly exposed, but they only have poor coverage from the NFIP.

How much commission are you leaving on the table by leaving your customers uncovered for flood?

reThought Flood uses technology to understand the flood risk for every building in the US. That means we charge prices that match the risk exactly: modest premiums for homes with moderate risk.

	reThought	NFIP
Building Coverage	\$5,000,000 Aggregate	\$250,000
Contents Coverage	\$5,000,000 Aggregate	\$100,000
